**REGULAR COLUMNS FROM
INDUSTRY PROFESSIONALS**

For PDi Magazine the global demolition industry comprises all techniques that in one way or another process concrete or other types of building materials. PDi monitors contracting activities and manufacturing within the following areas:

- **Demolition**
- **Recycling**
- **Hydrodemolition**
- **Hazardous Waste Handling**
- **Concrete Sawing & Drilling**
- **Concrete Floor Grinding & Polishing**
- **Dust Management**
- **Concrete Slurry Management**

PDi is the publishing authority for a global demolition, concrete cutting, recycling and concrete floor management market worth at least US\$ 28 Billion next year.

PDi, Professional Demolition International magazine, founded in 2000 is the only worldwide magazine devoted to serving the entire concrete sawing and drilling, demolition and recycling industries.

A broad coverage

PDi is distributed worldwide to nearly 10,000 companies. It has also a large internet coverage through separate news letters, website and Facebook. It is estimated that each issue is read by at least a minimum of six people at the same company/address. This means that we expect that at least 70,000 people read each issue plus numerous internet readers that is hard to count. Every issue of PDi Magazine always contains interesting and useful information about what is new and what is going on within the demolition, concrete sawing and drilling, concrete floor grinding and polishing, recycling, industrial cleaning and soil remediation industries around the globe.

Each year we publish country surveys including valuable figures, a number of special product features and company profiles. We also regularly estimate the size of the demolition, concrete sawing and drilling, floor grinding and recycling industries in total and separated country by country. PDi also maintains close relationships with several branch associations, which are regularly covered in the magazine. PDi Magazine is a member of the International Association of Concrete Drillers & Sawers as well as the European Demolition Association.

Growing industries

The total value of the world's professional demolition, concrete cutting, recycling industries and related activities is estimated to be well over US\$ 25 Billion, and is steadily growing year by year.

Our qualified staff at your service

PDi has a number of qualified writers and columnists based in different countries and another five executive sales representatives. We also have close co-operation with several branch associations. Please do not hesitate to contact our editorial team if you have any interesting projects or product launches that you would like us to cover. In this folder there is detailed information about the editorial calendar and circulation figures for 2015. On the following pages there is also information on advertising rates and contact information for our editors and sales representatives.

Welcome to one more year with PDi Magazine.
